Re: Floor Preparation for Refinishing at C-COM Satellite Systems Inc.

Youri and Arthur,

C-COM really appreciates the excellent work your team performed at our factory location in Ottawa on July 29th, 2016.

We were very impressed with the professional consultation and options presented from you Arthur. The refinishing system we chose was complemented by your Blastrac shotblasting concrete surface preparation, and it was scheduled well in advance, and fully completed in the one day specified.

I thought your team worked tirelessly through the whole day in a very professional manner, and your equipment was ideally suited to the job and the results were perfect. The video of your machine crew at work gave us a great idea of how the process works.

The final result was a totally fresh surface on our 30 and 50 year old concrete floors that were still in decent structural shape. The application of the refinishing system was applied to this ideal substrate for a very predictable result.

Again, thanks to provide C-COM with such top level service, and we are pleased to recommend Concrete Polishing & Sealing Ltd. to anyone interested.

Best Regards,

**James Duncan
Engineering Technologist
Manager – Product Development and Manufacturing**
